

SSIF Storage Security Summit - Where Security and Storage Meet

January 30 - February 1, 2008, Sun Santa Clara Campus Auditorium, Santa Clara, CA

Are you tasked with implementing data protection and security measures to meet legal, regulatory, and due diligence requirements? Do you know about the latest storage security technologies?

The Storage Security Summit, hosted by the SNIA Storage Security Industry Forum, is the only educational industry event specifically targeted to understanding the upfront and continuing effort required to secure the storage layer.

Sessions focus on vital issues confronting storage and security professionals today, including:

- **Key management**
- **eDiscovery**
- **Securing long-term archives**

The storage security landscape changes every day, with new challenges, new approaches, and new solutions. Gain the advantage - update your storage security knowledge by attending the Storage Security Summit.

Tutorials, presentations, panels, and networking opportunities all combine to create an informal environment where attendees can mingle and openly discuss issues with the leading storage and security experts in the field today.

Don't Miss the Summit Keynote on eDiscovery

With new regulations like the Federal Rules of Civil Procedure (FRCP), authentication has taken on an even more important role in the corporate compliance world. For those in the information security arena, it means deploying new technology to address emerging compliance challenges, as well as developing and adhering to robust policies built around these deployments.

Thursday's Summit keynote speaker Steven W. Teppler, CEO of TimeCertain, focuses on eDiscovery, providing new insights on what storage and security managers need to know.

"Both security and storage professionals need to understand the challenges of security in the storage ecosystem, and how they can manage the impact of electronic discovery, regulatory compliance, and personal identifiable information in their organization. The Storage Security Summit is a perfect example of the kind of educational opportunity the SSIF delivers."

— Eric Hibbard, CISSP, CISA
SSIF Storage Security Summit Chair

Gain the Advantage in Storage Security Technology: Professional Education, Networking, Knowledge

The SSIF Storage Security Summit includes a day of storage security tutorials, followed by technology presentations on the issues and challenges of today's storage security environment, how current and future storage security technology will evolve to meet these needs, and user perspectives on what is really happening in organizational environments. Start with the Tutorial Education Day on Wednesday, January 30, which gives a broad overview on the latest storage security subjects. Then take your knowledge and interact with peers and professionals in the storage, security, audit, and academic communities at the Summit on Thursday and Friday, January 31-February 1, featuring leading industry speakers and sessions on topics vital to your organization's current and future strategies.

The Summit offers the perfect opportunity to get a head start on those annual continuing professional education (CPE) requirements for professional organizations. Earn 8 credits at the Tutorial Education Day, and an additional 12 credits at the Summit!

SSIF Storage Security Tutorial Day - Wednesday, January 30	
8:00 am - 9:00 am	Tutorial Registration and Breakfast
9:00 am - 10:30 am	Fundamentals of Storage Security and a Dive into Best Practices, <i>Eric Hibbard, CISSP, CISA, ISSAP, ISSMP, ISSEP, Summit Chair; Senior Director, Hitachi Data Systems</i>
10:45 am - 12:15 pm	ABCs of Data Encryption - a Foundation and Checklist, <i>Roger Cummings, Office of the Chief Technology Officer, Symantec</i>
12:15 pm - 1:30 pm	Turbo Talks - Key Storage Security Solutions, <i>presented by Sun, Seagate, Hitachi, and Brocade</i>
1:30 pm - 2:45 pm	An Introduction to Key Management and Secure Storage and Best Practices for Building a Key Management Strategy: Understanding Standards and Solutions, <i>Walt Hubis, Software Architect, LSI Corporation</i>
3:00 pm - 4:00 pm	Cryptographic Use Cases and the Rationale for End-to-End Security, <i>Larry Hofer, CISSP, System Architect, Office of Technology, Emulex</i>
4:00 pm - 5:00 pm	Panel - Best Current Practices - Educating Individuals and the Industry on Storage Security, <i>Moderated by Blair Semple, CISSP, ISSEP, SSIF Education & Alliances Officer; Security Evangelist, NetApp</i>
SSIF Storage Security Summit Day 1 - Thursday, January 31	
8:00 am - 9:00 am	Summit Registration and Breakfast
9:00 am - 9:10 am	Welcome and Opening Remarks, <i>Vincent Franceschini, Chair, Storage Networking Industry Association; Senior Director of Future Technologies, Hitachi Data Systems & Gordon Arnold, Chair, Storage Security Industry Forum; Technical Lead, IBM</i>
9:10 am - 10:10 am	Keynote: eDiscovery and the Electronic Data Universe, <i>Steven W. Teppler, CEO, TimeCertain</i>
Storage Security and the Environment	
10:20 am - 11:00 am	Compliance and Storage Security, <i>Roger Bouchard, BCSD, BCISM, CISSP, Worldwide Security Practice Lead, Brocade</i>
11:00 am - 11:40 am	Living eDiscovery, <i>David Stevens, Storage Manager, Carnegie Mellon University</i>
11:40 am - 12:20 pm	Security and Its Impact on Worldwide Payment Card Industry
Research and Futures	
1:30 pm - 2:15 pm	Scalable Security for Petascale Parallel File Systems, <i>Ethan Miller, Associate Professor, CSD, UC Santa Cruz</i>
2:15 pm - 3:30 pm	100 Year Archive & Security Impacts, <i>Michael Peterson, Chief Strategy Advocate, SNIA Data Management Forum</i>
3:45 pm - 4:30 pm	Key Management Pitfalls and Precautions, <i>Walt Hubis, Software Architect, LSI Corporation</i>
4:30 pm - 5:30 pm	Town Hall Discussion - the Future of Storage Security
SSIF Storage Security Summit Day 2 - Friday, February 1	
8:00 am - 9:00 am	Summit Registration and Breakfast
User Perspectives	
9:00 am - 10:00 am	The "Grand Challenge" of Storage Security, <i>Eric Hibbard, CISSP, CISA, ISSAP, ISSMP, ISSEP, Summit Chair and Senior Director, Data Networking Technology, Hitachi Data Systems</i>
10:15 am - 11:00 am	User Perspectives on Storage Security, <i>Steve Hight, Director of Strategic Technology Projects, Office of the CIO, Catholic Healthcare West</i>
11:00 am - 11:45 am	Legal Issues and Security
11:45 am - 12:30 pm	Bringing It All Back Together - Panel Discussion on Compliance and eDiscovery
12:30 pm - 1:00 pm	Wrap Up and Summit Concludes

The Storage Networking Industry Association (SNIA) Storage Security Industry Forum (SSIF) is the place where storage professionals, security professionals, security practitioners, and academics work together to contribute to a better understanding of storage security and how it applies in the organization. SSIF members consolidate their vast body of knowledge and practical experiences in security and storage into high quality educational, technical, and engineering activities that influence the design, use, and management of storage technology to better protect and secure information. Find out more at www.snia.org/ssif. Members of the Storage Security Industry Forum are proud to host the Storage Security Summit in Santa Clara, CA.
