

# CONFORMANCE TESTING PROGRAM

---

CLOUD DATA MANAGEMENT INTERFACE (CDMI) TEST  
SPECIFICATION

---

VERSION 1.0a

*WORKING DRAFT*

APRIL 9, 2014

## SNIA Notice

This document contains a test specification that is based on the Storage Networking Industry Association (SNIA) Cloud Storage international standard (CDMI 1.01 and 1.02) provided by the SNIA Cloud Storage Technical Working Group (TWG).

This draft represents a "best effort" attempt by the Conformance Testing working group to reach preliminary consensus, and it may be updated, replaced, or deemed obsolete at any time. This document should not be used as reference material.

Suggestions for revisions should be directed to <http://www.snia.org/feedback/>.

### USAGE

The SNIA hereby grants permission for individuals to use this document for personal use only, and for corporations and other business entities to use this document for internal use only (including internal copying, distribution, and display) provided that:

1. Any text, diagram, chart, table or definition reproduced must be reproduced in its entirety with no alteration, and,
2. Any document, printed or electronic, in which material from this document (or any portion hereof) is reproduced must acknowledge the SNIA copyright on that material, and must credit the SNIA for granting permission for its reuse.

Other than as explicitly provided above, you may not make any commercial use of this document, sell any or this entire document, or distribute this document to third parties. All rights not explicitly granted are expressly reserved to SNIA.

Permission to use this document for purposes other than those enumerated above may be requested by e-mailing [tcmd@snia.org](mailto:tcmd@snia.org). Please include the identity of the requesting individual and/or company and a brief description of the purpose, nature, and scope of the requested use.

### DISCLAIMER

The information contained in this publication is subject to change without notice. The SNIA makes no warranty of any kind with regard to this specification, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The SNIA shall not be liable for errors contained herein or for incidental or consequential damages in connection with the furnishing, performance, or use of this specification.

## Revision History

| <b>Version</b> | <b>Date</b> | <b>Description of Changes</b>  | <b>Author</b>  |
|----------------|-------------|--|----------------|
| 1.0            |             | First draft of 1.0 Test Specification based on the CDMI 1.0.2 Test Spec provided by SNIA.  | Ankit Agarwal  |
| 4.0            | 4/8/14      | Performed technical edit of version 3.5. Reformatted document for consistency and proofed for errors. Added front matter per SNIA drafting standards and added DRAFT watermark. Made changes as specified in Trac Tickets 938, 940-943, 945, and 946.  | Marie McMinn   |
| 4.1            | 4/9/14      | Added the following: <ul style="list-style-type: none"> <li>• Create DataObject via Non-CDMI, read via CDMI: (6.4.2.14 CDMI_DataObject_Read_19)</li> <li>• Create DataObject via Non-CDMI, delete via CDMI: (6.4.4.5 CDMI_DataObject_Delete_6)</li> <li>• Create DataObject via CDMI, read via Non-CDMI: (7.4.2.9 DataObject_Read_NC_2R_10)</li> <li>• Create DataObject via CDMI, delete via Non-CDMI: (7.4.4.4 DataObject_Delete_NC_2D_4)</li> </ul> | Sachin Goswami |
| 4.2            | 4/10/14     | Performed consistency edits & fixed auto-numbering   | Marie McMinn   |
| 1.0a           | 4/17/14     | Changed internal version number to v1.0a for its first public Working Draft release  | Arnold Jones   |

## Table of Contents

|           |   |          |
|-----------|---|----------|
| <b>1</b>  | <b>Background and Overview.....</b>                                 | <b>1</b> |
| <b>2</b>  | <b>Scope .....</b>  | <b>1</b> |
| <b>3</b>  | <b>References .....</b>   | <b>1</b> |
| <b>4</b>  | <b>Rules to Follow.....</b>   | <b>1</b> |
| 4.1       | Conformance Test Process .....                                      | 1        |
| 4.2       | Test Specification Definitions and Details .....                    | 1        |
| <b>5</b>  | <b>Architecture and Design of the CDMI Test Specification .....</b> | <b>2</b> |
| <b>6</b>  | <b>CDMI Support.....</b>  | <b>2</b> |
| 6.1       | Server Authentication Test.....                                     | 2        |
| 6.1.1     | <i>Server Authentication Success (1C_L_1)</i> .....                 | 2        |
| 6.1.1.1   | Basic Authentication (1C_L_1.1).....                                | 2        |
| 6.1.1.2   | Digest Authentication (1C_L_1.2).....                               | 3        |
| 6.1.2     | <i>Server Authorization failure (1C_L_2)</i> .....                  | 5        |
| 6.1.2.1   | Basic Authentication (1C_L_2.1).....                                | 5        |
| 6.1.2.2   | Digest Authentication (1C_L_2.2):.....                              | 5        |
| 6.2       | Capability.....   | 7        |
| 6.2.1     | <i>CDMI_Capability_Read</i> .....                                   | 7        |
| 6.2.1.1   | CDMI_Capability_Read_3R_1.....                                      | 7        |
| 6.2.1.2   | CDMI_Capability_Read_3R_2.....                                      | 8        |
| 6.2.1.3   | CDMI_Capability_Read_3R_3.....                                      | 8        |
| 6.2.1.4   | CDMI_Capability_Read_3R_4.....                                      | 9        |
| 6.2.1.5   | CDMI_Capability_Read_3R_5.....                                      | 10       |
| 6.3       | Container.....  | 11       |
| 6.3.1     | <i>CDMI_Container_Create</i> .....                                  | 11       |
| 6.3.1.1   | CDMI_Container_Create_1C_1.....                                     | 11       |
| 6.3.1.2   | CDMI_Container_Create_1C_3.....                                     | 12       |
| 6.3.1.3   | CDMI_Container_Create_1C_4.....                                     | 13       |
| 6.3.1.4   | CDMI_Container_Create_1C_5.....                                     | 13       |
| 6.3.1.4.1 | <i>CDMI_Container_Create_1C_5.1</i> .....                           | 13       |
| 6.3.1.4.2 | <i>CDMI_Container_Create_1C_5.2</i> .....                           | 14       |
| 6.3.1.5   | CDMI_Container_Create_1C_9.....                                     | 15       |
| 6.3.1.6   | CDMI_Container_Create_1C_10 .....                                   | 16       |
| 6.3.1.7   | CDMI_Container_Create_1C_11 .....                                   | 16       |
| 6.3.1.8   | CDMI_Container_Create_1C_12 .....                                   | 18       |
| 6.3.2     | <i>CDMI_Container_Read</i> .....                                    | 19       |
| 6.3.2.1   | CDMI_Container_Read_1R_1 .....                                      | 19       |
| 6.3.2.2   | CDMI_Container_Read_1R_2 .....                                      | 20       |
| 6.3.2.3   | CDMI_Container_Read_1R_4 .....                                      | 20       |
| 6.3.2.4   | CDMI_Container_Read_1R_6 .....                                      | 21       |

|           |                                    |    |
|-----------|------------------------------------|----|
| 6.3.2.5   | CDMI_Container_Read_1R_7 .....     | 22 |

DRAFT

## 1 Background and Overview

SNIA has introduced the Cloud Data Management Interface (CDMI) international standard. By adopting this international standard, vendors gain greater market acceptance than they do from adopting proprietary interfaces, while end users of products complying with the CDMI international standard gain greater interoperability between cloud storage providers.

## 2 Scope

In this test specification document, we define the overall test scope and test specifications for the Storage Network Industry Association (SNIA) to test the conformance to the CDMI specifications.

This document plays a key role in creating conformance certification test suites. The fundamental purpose of this specification is as follows:

- To observe the overall scope of the test specification and the total number of test specifications
- To observe the test coverage achieved over the SNIA standard that a vendor product addresses
- To identify the various components and test the configurations that are used
- To explain and understand each scenario to be tested and identify the requirements it covers

## 3 References

References are based on the SNIA-provided international standard CDMI 1.0.2. This document is listed for reference.

CDMI Specification - <http://cdmi.sniacloud.com/>

## 4 Rules to Follow

### 4.1 Conformance Test Process

The goal of conformance testing is to ensure that the target product is implemented according to the CDMI international standard and complies with the mandatory features and specific profiles that are specified in this international standard. In addition, optional features may be checked when all capabilities are available on the CDMI server.

### 4.2 Test Specification Definitions and Details

The test descriptions are provided in a test specification format, which contains the following:

- Header with the test case description
- Test specification ID
- Test case name
- Test case description

- Pre-test dependencies, which define conditions to apply before starting the test
- Description, which identifies the test case execution steps, expected results, verification header fields, expected values, and messages provided in the CDMI international standard

## 5 Architecture and Design of the CDMI Test Specification

## 6 CDMI Support

The SNIA CDMI international standard is intended for application developers who are implementing or using cloud storage. It documents how to access cloud storage and to manage the data stored there.

### 6.1 Server Authentication Test

A CDMI server shall implement basic only, digest only, or both. Which authorization is supported will be indicated by the authentication challenge returned when an operation is attempted without authentication.

These test cases will perform digest or basic authentication according to a WWW-Authenticate response. Digest or basic authentication test cases should run depending on the implementation.

#### 6.1.1 Server Authentication Success (IC\_L\_1)

##### 6.1.1.1 Basic Authentication (1C\_L\_1.1)

|  |  |
|--|--|
| <b>CDMI Container Create Logging Credentials Specification Reference</b> | CDMI Specification v1.0.2 – Section: 9.2                                     |
| <b>Test Specification Id</b>   | 1C_L_1.1   |
| <b>Test Case Name</b>  | LoginAuthentication_Success  |
| <b>Test Case Description</b>   | To create a container with correct credentials                               |
| <b>Pre-Test Dependencies</b>   | This test case will run if CDMI server implements Basic (WWW- Authenticate). |

**D E S C R I P T I O N****<Test Case : Start>**

1. Set valid credentials in Request.

UserName : <Correct user name>

Password : <Correct password>

2. Set Basic Authorization header:

Authorization: "Basic " + Base64(UserName:Password)

3. Request URL: <Reference: CDMI Specification v1.0.2 – Section: 9.2.1>

Request Header: <Reference: CDMI Specification v1.0.2 – Section: 9.2.4>

Request Body: <Reference: CDMI Specification v1.0.2 – Section: 9.2.5>

Request Sample with Body:

```
PUT <root URI>/TestContainer1/ HTTP/1.1
Host: cloud.example.com
```

```
Accept: application/cdmi-container
Content-Type: application/cdmi-container
X-CDMI-Specification-Version: 1.0.2
```

```
{
}
```

4. Check for HTTP status code: **201 Created** returned.

<Reference :CDMI Specification v1.0.2 – Section: 9.2.8>

5. Container created.

6. Container cleanup process :<Reference: 6.5.1 Container Cleanup>

**<Test Case : End>*****6.1.1.2 Digest Authentication (1C\_L\_1.2)***

| <b>Test Specification Id</b>   | 1C_L_1.2   |
| <b>Test Case Name</b>  | containerCreate_LoginAuthentication_Success                                  |
| <b>Test Case Description</b>   | To create a container with correct credentials                               |
| <b>Pre-Test Dependencies</b>   | This test case will run if CDMI server implements Digest (WWW-Authenticate). |

**D E S C R I P T I O N****<Test Case : Start>**

1. Set valid credentials in Request.

UserName : <Correct user name>  
Password : <Correct password>

2. Set Digest Authorization header:

```
read "realm", "nonce", "qop" and "opaque" from Server Response Header  
"WWW-Authenticate"  
nc= 00000001  
cnonce="0a4f113b"  
String HA1 = MD5(UserName:realm:Password)  
String HA2 = MD5(Method:URI)  
String responseStr = MD5(HA1:nonce:nc:cnonce:qop:HA2)  
Authorization: Digest username= UserName,  
    realm=realm,  
    nonce=nonce,  
    uri=<root URI>/TestContainer1/,  
    qop=qop,  
    nc=nc,  
    cnonce=cnonce,  
    response=responseStr,  
    opaque=opaque
```

3. Request URL: <Reference: CDMI Specification v1.0.2 – Section: 9.2.1>

Request Header: <Reference: CDMI Specification v1.0.2 – Section: 9.2.4>

Request Body: <Reference: CDMI Specification v1.0.2 – Section: 9.2.5>

Request Sample with Body:

```
PUT <root URI>/TestContainer1/ HTTP/1.1  
Host: cloud.example.com
```

```
Accept: application/cdmi-container  
Content-Type: application/cdmi-container  
X-CDMI-Specification-Version: 1.0.2  
  
{  
}
```

4. Check for HTTP status code: **201 Created** returned.

<Reference :CDMI Specification v1.0.2 – Section: 9.2.8>

5. Container created.

6. Container cleanup process :<Reference: 6.5.1 Container Cleanup>

**<Test Case : End>**

#### DESCRIPTION

##### <Test Case : Start>

1. Set valid login credentials. <Reference: Test Spec Id: **1C\_L\_1**>
2. Create a container named "TestContainer1" <Reference: Test Spec Id: **1C\_1**>
3. Retrieve value of capability "cdmi\_metadata\_maxitems" in 'no\_of\_metadata\_maxitems'
4. Request URL: <Reference: CDMI Specification v1.0.2 – Section: **8.2.1**>  
Request Headers: <Reference: CDMI Specification v1.0.2 – Section: **8.2.4**>  
Request Body:<Reference: CDMI Specification v1.0.2 – Section: **8.2.5**>

Request Sample with Body:

```
PUT <root URI>/TestContainer1/data_object1 HTTP/1.1
Host: cloud.example.com
```

```
Accept: application/cdmi-object
Content-Type: application/cdmi-object
X-CDMI-Specification-Version: 1.0.2
```

```
{
  "metadata" : {
    "Test Field" : "Test Value"
  }
}
```

5. Verify that all mandatory fields exist: <Reference: CDMI Specification v1.0.2 – Section: **8.2.7**>

List of mandatory fields for "data\_object1":

- objectType
- objectID
- objectName
- parentURI
- domainURI (**Conditional:** If system-wide capability "cdmi\_domains" is present and true)
- parentID
- capabilitiesURI
- metadata

- completionStatus
- mimetype
- Check for HTTP status code: **201 Created** returned.
- <Reference: CDMI Specification v1.0.2 – Section: **8.2.8**>
- Expected Result: Data object "data\_object1" should be created.
- Container cleanup process: <Reference: 6.5.1 Container Cleanup>

**<Test Case : End>**

<Test Case : End>

## 6.5 Server Cleanup Process

After execution of test scripts, the server should be reverted to an initiated state for further testing. To complete this process after execution of each test case, a script will be run to delete the leftover resources produced by that test case.

### 6.5.1 Container Cleanup

|                              |  |
|------------------------------|--|
| <b>Call Container Delete</b> | Container should be deleted<br><Reference: 6.3.4 CDMI_Container_Delete_1D_1> |
|------------------------------|--|

### 6.5.2 Data Object Cleanup

|                                |  |
|--------------------------------|--|
| <b>Call Data Object Delete</b> | Data object should be deleted<br><Reference: 6.4.4 CDMI _DataObject_Delete_2D_1> |
|--------------------------------|--|

## 7 Non-CDMI Support

Non-CDMI operation is specifically designed for non-CDMI-aware clients. Most of the existing clients are not aware of the CDMI standard. In such cases, the client has been given limited privilege (i.e., to create and delete containers and to create, delete, update, and read data objects) to perform the operation.

#### **D E S C R I P T I O N**

<Test Case : Start>

1. Set valid login credentials. <Reference: Test Spec Id: 1C\_L\_1>
2. Create a container named "TestContainer1". <Reference: Test Case Id: NC\_1C\_1>
3. Create a data object named "data\_object1":
4. Request URL: <Reference: CDMI Specification v1.0.2 – Section: 8.3.1>  
 Request Body:<Reference: CDMI Specification v1.0.2 – Section: 8.3.4>

Request Sample with Body:

```
PUT <root URI>/TestContainer1/data_object1 HTTP/1.1
```

This is the value of this Data Object.

5. Check for HTTP status code: **400 Bad Request** returned.  
 <Reference: CDMI Specification v1.0.2 – Section: 8.3.7>
6. Expected Result: Data object cannot be created.
7. Container cleanup process :<Reference: 7.5.1 Non-CDMI Container Cleanup>

<Test Case : End>

#### 7.4.3.5 DataObject\_Update\_NC\_2U\_7

|                                     |   |
|-------------------------------------|---|
| <b>CDMI Specification Reference</b> | <b>Reference:</b> CDMI Specification v1.0.2 – Section: <b>8.7</b>   |
| <b>Test Specification Id</b>        | NC_2U_7   |
| <b>Test Case Name</b>               | dataobjectUpdate_NC_2U_7  |
| <b>Test Case Description</b>        | To update a data object that is a reference to a CDMI data object.  |
| <b>Pre-Test Dependencies</b>        | Capability in data object: cdmi_modify_value<br><b>&lt;Reference:</b> CDMI Specification v1.0.2 – Section: <b>8.7.2</b> ><br>System-wide capability:<br>cdmi_dataobjects<br><b>&lt;Reference:</b> CDMI Specification v1.0.2 – Section <b>12.1.1</b> > |

**D E S C R I P T I O N****<Test Case : Start>**

1. Set valid login credentials.<Reference: Test Case Id : 1C\_L\_1>
2. Create a reference data object "DataObject2" of data object "DataObject1" <Reference: Test Id: 2C\_17>
3. Request URL: <Reference: CDMI Specification v1.0.2 – Section: 8.7.1>  
Request Headers: <Reference: CDMI Specification v1.0.2 – Section: 8.7.3>  
Request Body: <Reference: CDMI Specification v1.0.2 – Section: 8.7.4>

Request Sample with Body:

```
PUT <root URI>/TestContainer1/DataObject2 HTTP/1.1
Host: cloud.example.com
```

Content-Type: text/plain

This is the updated values of this data object.

4. Check for HTTP status code: **302 Found** returned.  
<Reference: CDMI Specification v1.0.2 – Section: 8.7.7>
5. Expected Result: Data object should be updated.
6. Container cleanup process :<Reference: 6.5.1 Container Cleanup>

## 8 Profile-Based Support

SNIA has published profiles in the CDMI international standard, which an implementation can support to provide specific functionalities. This specification uses these profiles to scope the testing of CDMI implementations.

### 8.1 Basic Service-Based Profile

See [http://snia.org/sites/default/files/CDMI\\_Profile-BasicStorageServiceV1\\_0e.pdf](http://snia.org/sites/default/files/CDMI_Profile-BasicStorageServiceV1_0e.pdf)

#### 8.1.1 Mandatory Tests

The mandatory tests include the following:

- Container Create using a Non-CDMI Content Type - See 7.3.1 Non\_CDMI\_Container\_Create
- Container Read using CDMI Content Type - See [6.3.2 CDMI\\_Container\\_Read](#)
- Container Delete using a Non-CDMI Content Type - See [7.3.2 Non\\_CDMI\\_Container\\_Delete](#)
- Data Object Create using a Non-CDMI Content Type - See [7.4.1 Non\\_CDMI\\_DataObject\\_Create](#)
- Data Object Read using a Non-CDMI Content Type - See [7.4.2 Non\\_CDMI\\_DataObject\\_Read](#)
- Data Object Update using a Non-CDMI Content Type - See [7.4.3 Non\\_CDMI\\_DataObject\\_Update](#)
- Data Object Delete using a Non-CDMI Content Type - See [7.4.4 Non\\_CDMI\\_DataObject\\_Delete](#)

#### 8.1.2 Optional Tests

The optional tests include the following:

- Container Create using CDMI Content Type - See [6.3.1 CDMI\\_Container\\_Create](#)
- Container Update using CDMI Content Type - See [6.3.3 CDMI\\_Container\\_Update](#)
- Container Delete using CDMI Content Type - See [6.3.4 CDMI\\_Container\\_Delete](#)
- Data Object Create using CDMI Content Type - See [6.4.1 CDMI\\_DataObject\\_Create](#)
- Data Object Read using CDMI Content Type - See [6.4.2 CDMI\\_DataObject\\_Read](#)
- Data Object Update using CDMI Content Type - See [6.4.3 CDMI\\_DataObject\\_Update](#)
- Data Object Delete using CDMI Content Type - See [6.4.4 CDMI\\_DataObject\\_Delete](#)

## 8.2 Self -Storage Management Profile

See <http://snia.org/sites/default/files/Self-Storage%20Management%20Profile%20v1.0e.pdf>

### 8.2.1 Mandatory Tests

The mandatory tests include the following:

- Container Create using CDMI Content Type - See [6.3.1 CDMI\\_Container\\_Create](#)
- Container Read using CDMI Content Type - See [6.3.2 CDMI\\_Container\\_Read](#)
- Container Update using CDMI Content Type - See [6.3.3 CDMI\\_Container\\_Update](#)
- Container Delete using CDMI Content Type - See [6.3.4 CDMI\\_Container\\_Delete](#)

### 8.2.2 Optional Tests

The optional tests include the following:

- Data Object Create using CDMI Content Type - See [6.4.1 CDMI\\_DataObject\\_Create](#)
- Data Object Read using CDMI Content Type - See [6.4.2 CDMI\\_DataObject\\_Read](#)
- Data Object Update using CDMI Content Type - See [6.4.3 CDMI\\_DataObject\\_Update](#)
- Data Object Delete using CDMI Content Type - See [6.4.4 CDMI\\_DataObject\\_Delete](#)

## 9 Test Standards Conventions

The Test Case ID should be in the following format:

<Feature Identifier (optional)><Object Identifier><Operation Identifier>\_<TestCaseCount>

Where:

- <Feature Identifier (optional)> represents features. This field is optional and will be used for the following test cases:

| Feature             | Feature Identifier |
|---------------------|--------------------|
| Non-CDMI Test Cases | NC                 |

- <Object Identifier> is a numeric value and should be used as follows:

| Object Name | Object Identifier |
|-------------|-------------------|
| Container   | 1                 |
| Data Object | 2                 |
| Capability  | 3                 |

- <Operation Identifier> is a character set that represents what operation this test case will perform and should be used as follows:

| Operation Name | Operation Identifier |
|----------------|----------------------|
| Create         | C                    |
| Read           | R                    |
| Update         | U                    |
| Delete         | D                    |
