

Data-Centric Focus

SNIA is an industry organization that develops global standards and delivers education on all technologies related to data.

“How we consume, process, and protect data is intricate and involved. SNIA is at the core of the entire IT ecosystem, helping the world advance and standardize both established and emerging technologies to facilitate and improve all technologies and workloads related to data.”

- Dr. J Metz, Chair, SNIA Board of Directors

SNIA At-a-Glance

Our members collaborate to develop and promote vendor-neutral standards, architectures, and education to manage, move, and secure data.
