

Data-Centric Focus

SNIA is an industry organization that develops global standards and delivers education on all technologies related to data.

“How we consume, process, and protect data is intricate and involved. SNIA is at the core of the entire IT ecosystem, helping the world advance and standardize both established and emerging technologies to facilitate and improve all technologies and workloads related to data.”

- Dr. J Metz, Chair, SNIA Board of Directors

SNIA At-a-Glance

Our members collaborate to develop and promote vendor-neutral standards, architectures, and education to manage, move, and secure data.

200 industry leading organizations

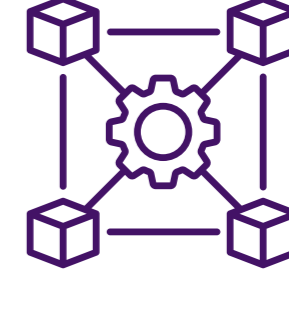

2,000 active contributing members

50,000 IT end users & industry pros worldwide

Developing and Promoting Storage Standards

For over 25 years, SNIA has developed standards, best practices, and technical specs to ensure interoperability and efficiency across storage technologies.

25+ Years = 200+ Standards

Education and Advocacy

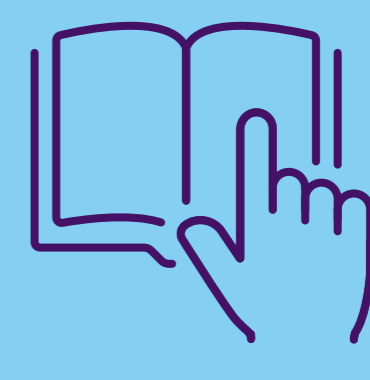

SNIA provides educational resources for storage professionals and advocates for advancements in architecture, data storage, and emerging technologies.

Educational Library with over 3,200 content assets

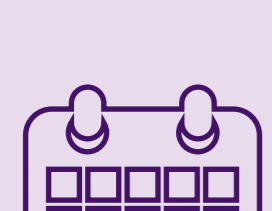

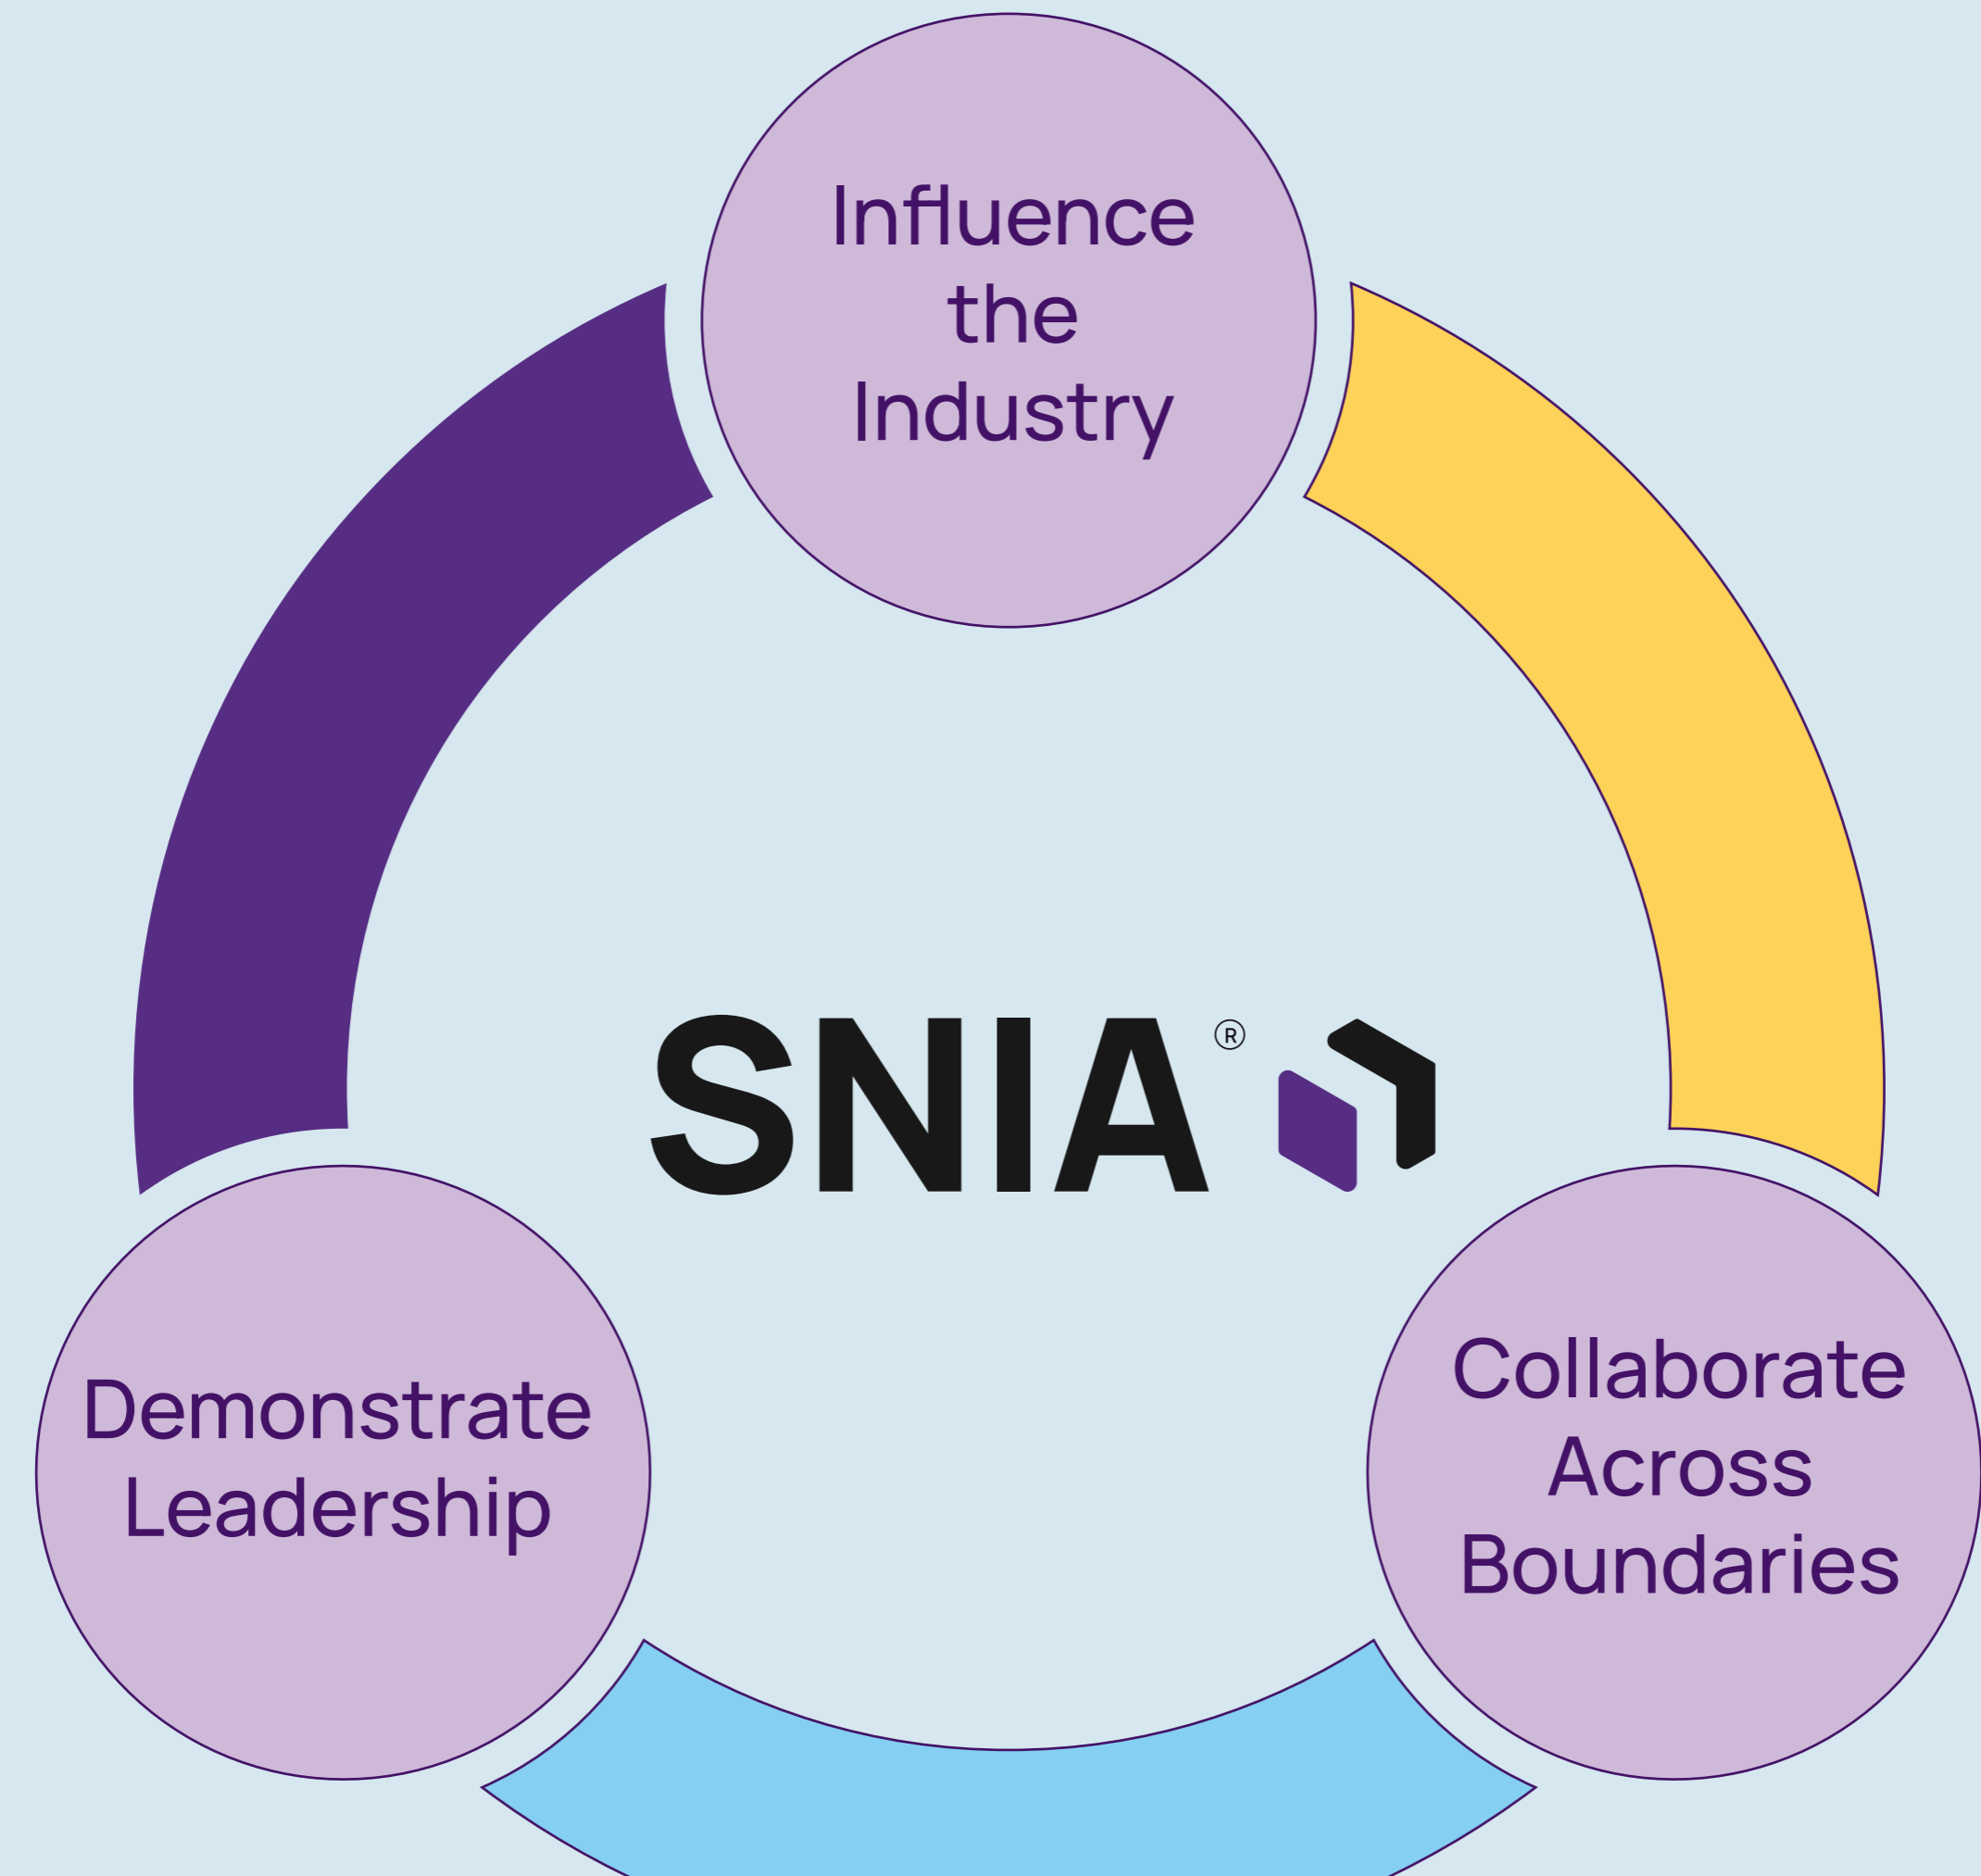

Blogs, webinars, articles, podcasts and infographics

Peer-reviewed dictionary with over 2,000 IT definitions

Value of Participation

SNIA Events

BY Developers FOR Developers

SNIA Developer Conferences

Designed by developers, for developers, it's the go-to event for engineers, product managers, CTOs, and tech pros ready to shape the future.
