Enterprise Data Storage Product Challenge

**Scale and manage
data growth**

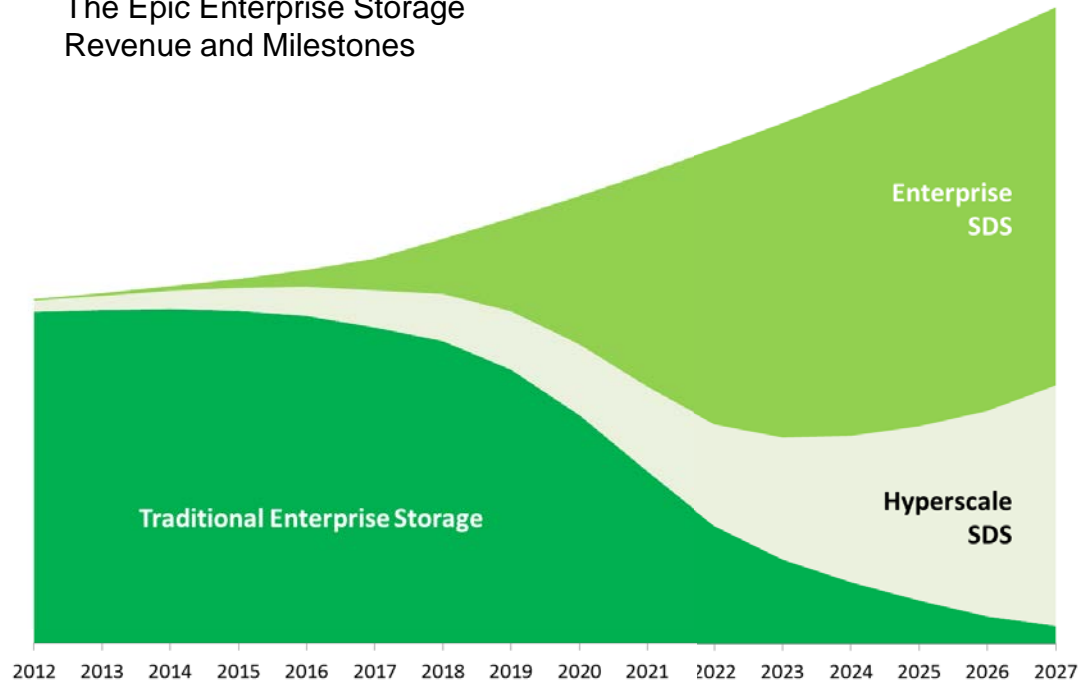

Control storage costs

**Support today's
investment and
adapt to the future**

What is happening in the Market?

The Epic Enterprise Storage Revenue and Milestones

By 2019, more than 50% of the storage capacity installed in enterprise data centers will be deployed with software-defined storage or hyperconverged integrated system architectures based on x86 hardware systems, up from less than 10% today

—Gartner

SUSE Cares About The Right Things

Enterprise Consumable – SUSE Focus Areas

Manageability

- Ease of install
- Centralized management, monitoring, reporting

Interoperability

- Unified block/file/object (heterogeneous OS access)
- Fabric interconnect

Efficiency

- Cache tiering
- Deduplication/compression
- Hierarchical storage management

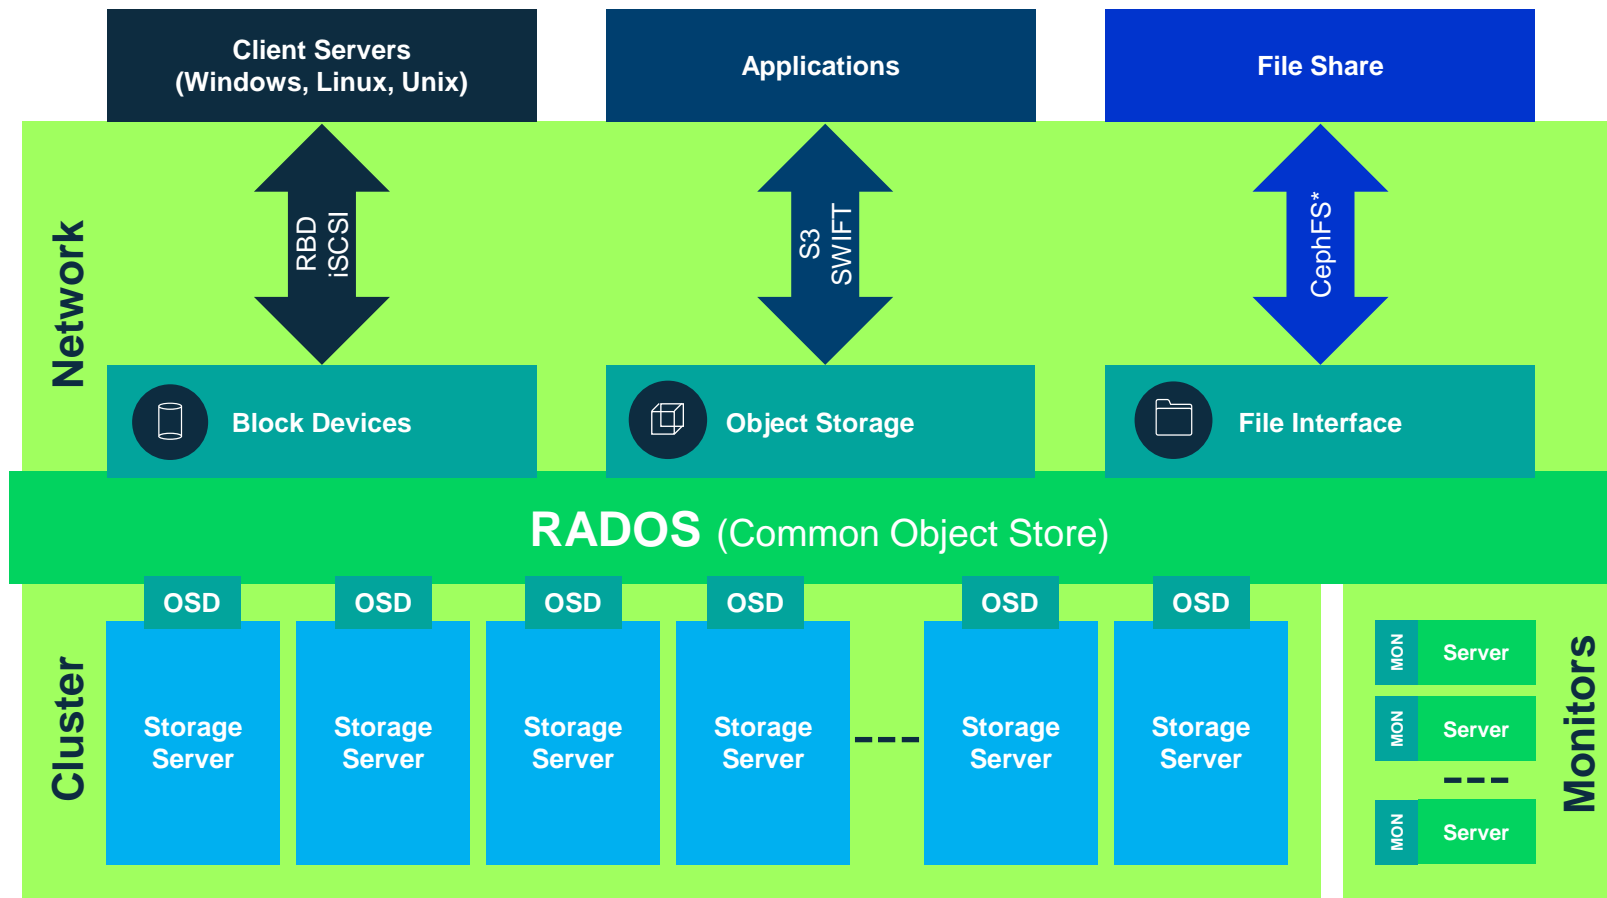

Availability

- Backup/archive
- Continuous data protection
- Remote replication

SUSE Enterprise Storage Is Robust!

SUSE Enterprise Storage

Powered by Ceph

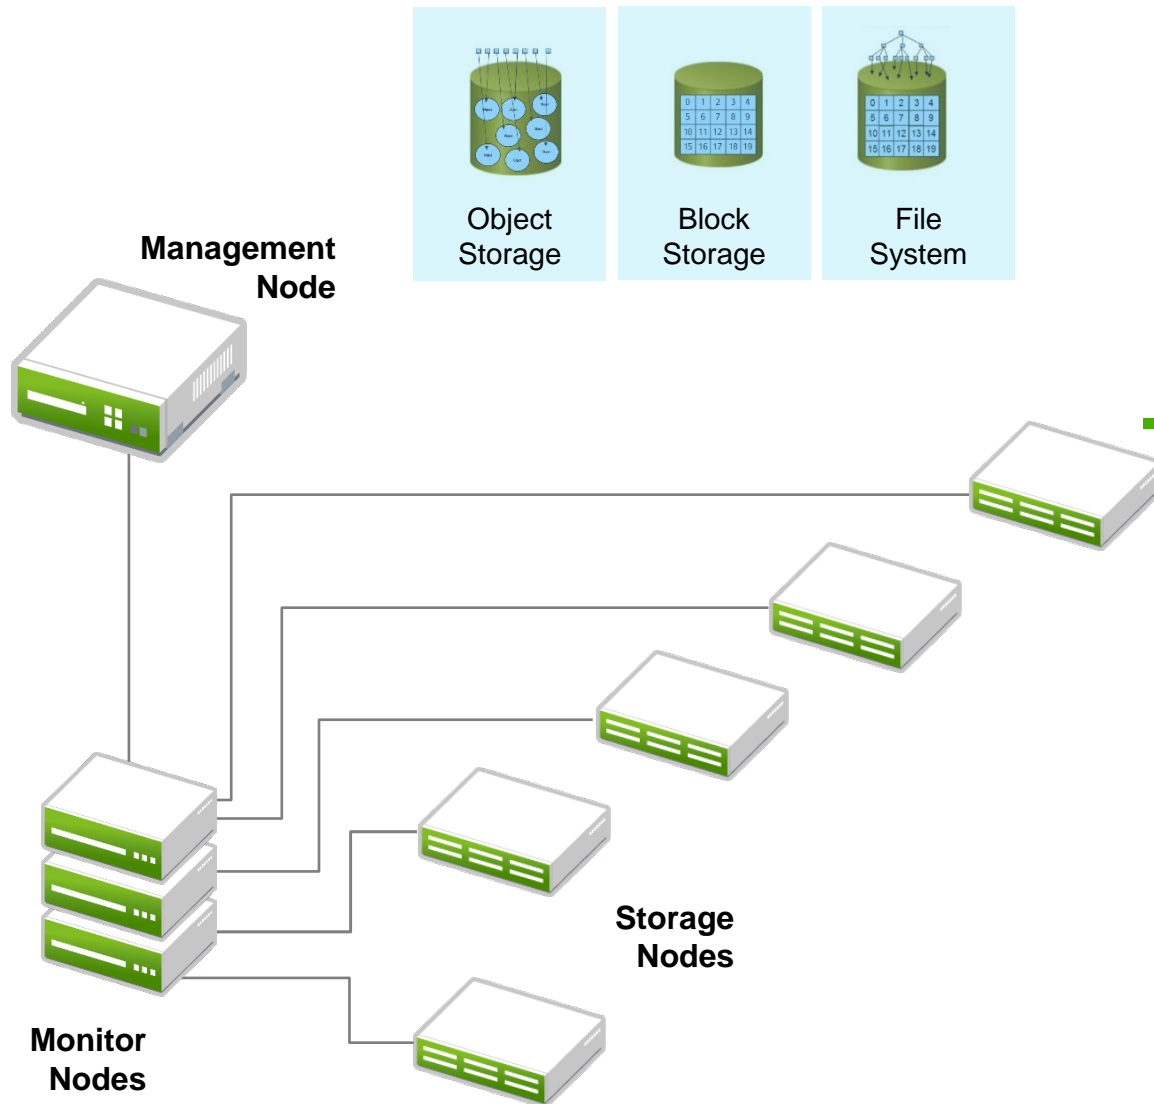

The Ceph Board

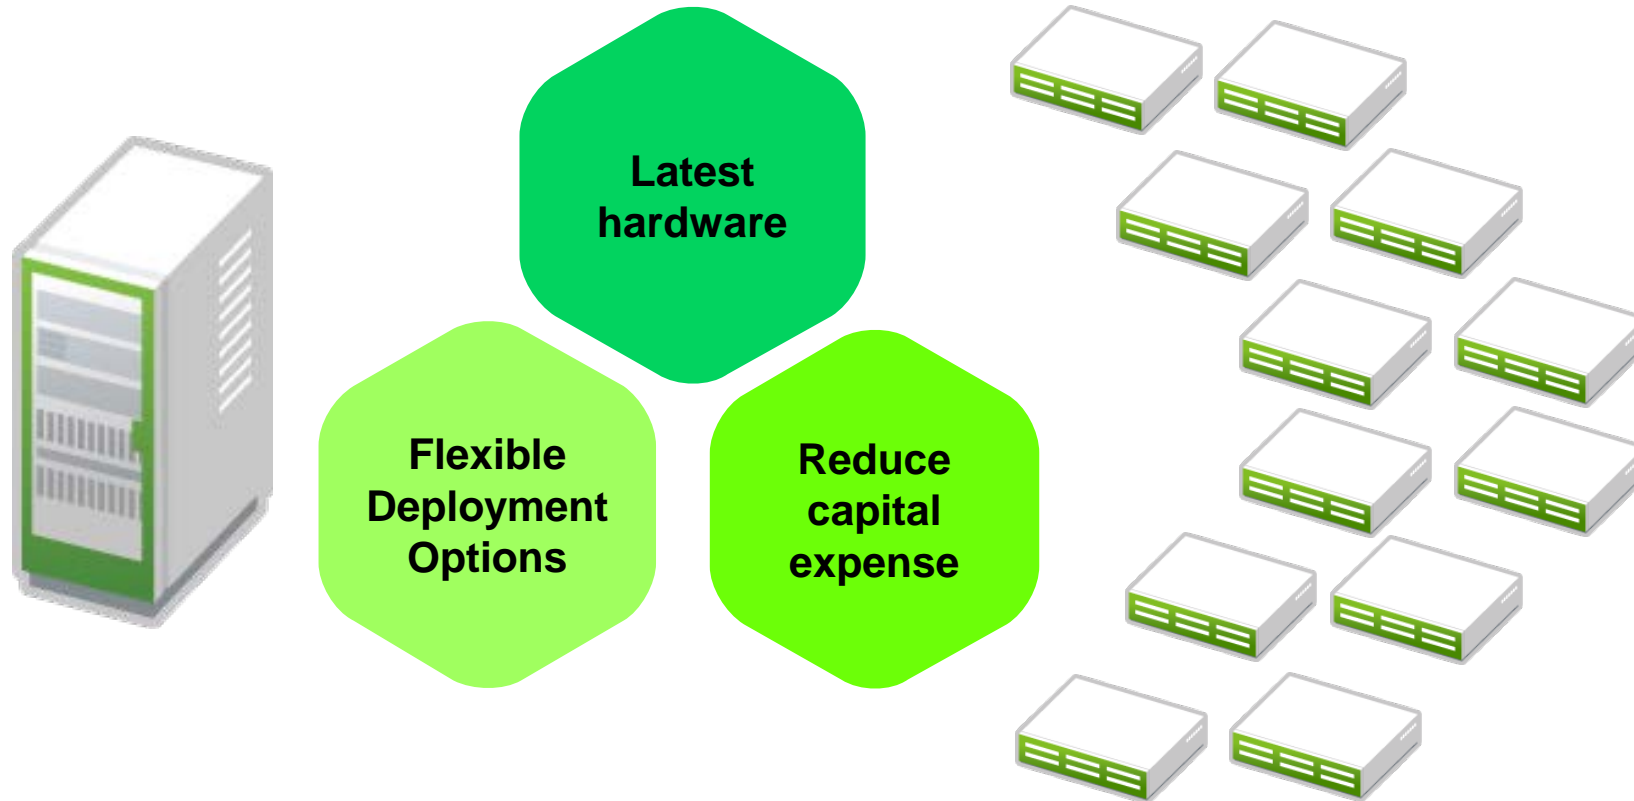

SUSE Enterprise Storage

Unlimited Scalability with Self Managing Technology

SUSE Enterprise Storage

Enterprise Class Storage Using Industry Standard Servers and Disk Drives

SUSE Enterprise Storage

Traditional Datacenter

Legacy Datacenter

- Network, compute, and storage silos
- Traditional protocols – Fibre Channel, iSCSI, CIFS, NFS

Process-driven

- Slow to respond

This is what customers have today

Software Defined

Software Defined Data Center

- Software-defined everything

Agile infrastructure

- Supporting a DevOps model
- Business-driven

This is where customers want to go

Support today's investment

SUSE Enterprise Storage Doesn't Want You To Suffer Loss

Expandable 720TB Infrastructure

Campus Ceph Architecture

3x copies of data
Infinitely Expandable

The Top of Rack switches are redundantly connected to building level switches OR connected to each other in a ring topology

Nodes are spread evenly across buildings to reduce risk of data loss in a single event

Each server is connected via LACP bond to stacked top of rack switches

SUSE Enterprise Storage Gets Stuff Done

Content Store

Scientific Organizations

- Meteorological data
- Telescope recordings
- Satellite feeds

Media Industries

- TV stations
- Radio stations
- Motion picture distributors
- Web music/video content

Video Surveillance

- Facility security surveillance
- Red light/traffic cameras
- License plate readers
- Body cameras for law enforcement
- Military/government visual reconnaissance

Object or block bulk storage

- Data that constantly grows during the course of business
- SharePoint data
- D2D Backup
 - HPE Data Protector, CommVault, Veritas and others
- Financial records

Virtual Machine (VM) Storage

- Ceph is already the leading storage choice for OpenStack environments
- Low and mid i/o virtual machine storage for major hypervisor platforms
 - kvm – native RBD
 - Hyper-V – iSCSI
 - VMware - iSCSI

With SUSE Enterprise Storage, you can...

Scale quickly, easily, inexpensively

Automate data management for greater efficiency

Use commodity off-the-shelf (COTS) hardware to lower CAPEX costs

Get out of vendor lock-in

Access the latest processor, memory or storage technology – today

Deploy SDS in your current data center AND take it with you into your next generation data center

Thank You!
