Swordfish Ask the Experts Panel: Sharing Implementation Experiences

Storage Management Initiative

About the Panel

- ❑ **Moderator: Leah Schoeb, Turbonomic**
- ❑ **Panelists:**
 - ❑ Richelle Ahlvers, Broadcom Limited
 - ❑ George Ericson, Dell
 - ❑ Anand Nagarajan, Microsemi
 - ❑ Slawek Putyrski, Intel

Your Panelists

Richelle Ahlvers, Broadcom Limited

Richelle has spent over 20 years in Enterprise Storage R&D teams in a variety of technical roles, leading the architecture, design and development of storage array software, storage management software user experience projects including mobility, developing new storage industry categories including SAN management, storage grid and cloud, and storage technology portfolio solutions.

George Ericson, Dell

George presently works for the Office of the CTO within Dell's Storage Division. He is responsible for the promotion, architecture and design of common interfaces for management and control of Dell storage products. He is a principal contributor to SNIA and DMTF management standards and is currently engaged with developing and promoting the DMTF Redfish and SNIA Swordfish management standards.

Your Panelists

Anand Nagarajan, Microsemi

Anand is a Technical Lead for software management application design and development at Microsemi. He has extensive experience in storage domain in different layers of the direct attach storage stack including SMIS, Redfish and Swordfish providers, middleware, RAID firmware and SAS protocol layer. Anand holds a Bachelor's Degree in Engineering from VTU.

Slawek Putyrski, Intel

Slawek is a Senior System Architect at Intel Corporation in the Gdynia, Pomeranian District of Poland, where he has served for 18 years. He has over 22 years experience in software systems architecture and validation. Slawek holds a M.Sc. in Computer Science and an M.Sc. In Electronics from the Technical University of Gdansk.
