# Accelerating Windows Integrations: Introducing the SNIA Swordfish™ PowerShell Tool Kit and Windows Admin Center Integration

Chris Lionetti  
HPE

Barkz  
Pure Storage

# Agenda

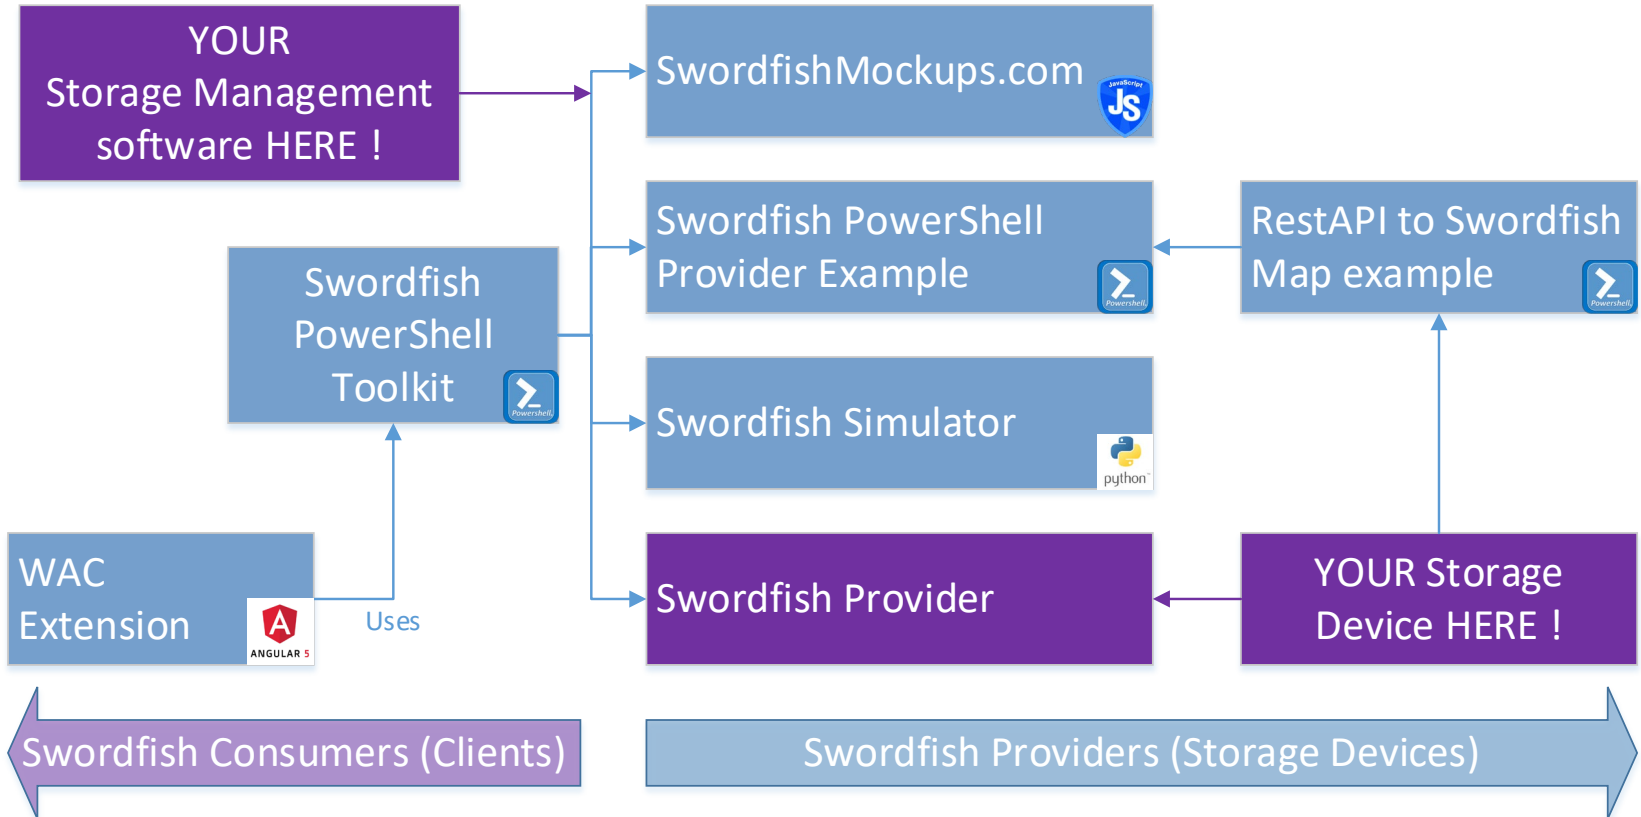

23-26, 2019  
Santa Clara, CA

- Overview of SwordFish™ PowerShell Toolkit
- Overview of Windows Admin Center (WAC)
- Building a WAC Gateway Extension

# Which Tools are right for you!

- Swordfish PowerShell Toolkit
- Swordfish to RestAPI Map
- Swordfish PowerShell Provider Framework
- Swordfish Emulator
- Swordfish Mockup website

# Which Tools are right for you!

# **SNIA SWORDFISH™ POWERSHELL TOOLKIT**

# PowerS

- Everything is returned
  - Cast to Variable
  - Can filter by property
  - Can dig deeper into objects
  - And you can even

```
PS C:\> $MyVols[4] | convertto-json
{

```

# PowerShell Command Help

- Get a list of valid commands

```
Get-Command -Module SNIASwordFish
```

```
Administrator: Windows PowerShell
PS C:\> get-help Get-SwordFishVolume -Full

NAME
-----
Get-SwordFishVolume

SYNOPSIS
    Retrieve The list of valid Volumes from the SwordFish Target.

SYNTAX
    Get-SwordFishVolume [[-StorageServiceID] <String>] [[-VolumeId] <String>] [<CommonParameters>]

DESCRIPTION
    This command will either return the a complete collection of Volumes that exist across all of
    the Storage Services, unless a specific Storage Service ID is used to limit it, or a specific
    Volume ID is directly requested.

PARAMETERS
    -StorageServiceID <String>
        The Storage Service ID name for a specific Storage Service, otherwise the command
        will return Storage Groups for all Storage Services.
    -VolumeId <String>
        The Storage Group ID will limit the returned data to the type specified, otherwise the command
        will return all Volumes.

NOTES
    ----- EXAMPLE 1 -----
    PS C:\>Get-SwordFishStorageVolume
    ----- EXAMPLE 2 -----
    PS C:\>Get-SwordFishStorageVolume -StorageServiceId AC-102345
    ----- EXAMPLE 3 -----
    PS C:\>Get-SwordFishStorageVolume -StorageServiceId AC-102345 -VolumeId 2
```

# PowerShell Toolkit Work Items

## The PowerShell Toolkit commands;

- Get-SwordFishChassis (+ Power, +Thermal)
- Get-SwordFishDrive
- Get-SwordFishEndpoint
- Get-SwordFishEndpointGroup
- Get-SwordFishStoragePool
- Get-SwordFishStorageService
- Get-SwordFishVolume
- Get-SwordFishClassOfService
- Connect-SwordFishTarget
- Connect-SwordfishMockup

## Command sets that need to be written;

(in order of priority)

- New/Set/Remove-SwordFishEndpoint
- New/Set/Remove-SwordFishEndpointGroup
- New/Set/Remove-SwordFishStoragePool
- New/Set/Remove-SwordFishStorageGroup
- New/Set/Remove-SwordFishConsistencyGroup
- New/Set/Remove-SwordFishVolume
- Set-SwordFishStorageService
- Set-SwordFishChassis
- Get/New/Set/Remove-\*LoS
- New/Set/Remove-SwordFishClassOfService

- Common Nomenclature
  - RestAPI vs PowerShell. Create = New, Read = Get, Update = Set, Delete = Remove
- All Commands must have inline help before being checked into the build
- All Commands must work against BOTH the Swordfish Targets (directly) and SwordFishMockups.com
- All Commands are open source, no compiled code or external DLL dependencies

# RestAPI to SWORDFISH™ Mapping

# Create a File Structure to match Swordfish

Santa Clara, CA

SEE [HTTPS://GITHUB.COM/CHRIS-LIONETTI/SWORDFISHMOCKUP](https://github.com/Chris-Lionetti/SwordfishMockup)

- Using PowerShell you can create a function for each thing you wish to express in SwordFish.
- Make a master script that runs you function against all things in your device.
- Create PowerShell Objects that can be converted to JSON as saved as Index.json files.
- In example to right, Variables all start with '\$' and constants are shown in brown.

```
$VolObj = @{'@Redfish.Copyright' = $RedfishCopyright;
           '@odata.context'     = '/redfish/v1/$metadata#Volumes/'+$NimbleSerial+'/Volumes/'+$Snapshot.name;
           '@odata.id'         = '/redfish/v1/$metadata#Volumes/'+$NimbleSerial+'/Volumes/'+$Snapshot.name;
           '@odata.type'       = '#Volumes_1_4_0.Volume';
           Id                   = $Snapshot.id;

# **SWORDFISH™ PowerShell Provider Example**

September 23-26, 2019  
Santa Clara, CA

**DEMO**

SNIA Swordfish™ PowerShell Toolkit

# **Developing a Windows Admin Center Gateway for SwordFish™**

September 23-26, 2019

# EXTENSION TYPES

- WAC context is based on a Tool or Solution Extension
- Tool Extensions
  - Executes either WMI calls or PowerShell scripts
  - Side load extension for debugging

```
MsftSme.sideLoad("http://localhost:4201")
```

- Solution extensions are based on a Connection Context
  - Servers
  - Hyper-Converged
  - Solution Extensions (3rd Party)
  - Computers
  - Failover Clustering

September 23  
Santa Clara, CA

# WAC SDK 1.0

- SDK versions
  - `.latest` – The latest SDK for production development/deployment
    - "@microsoft/windows-admin-center-sdk": "latest",
  - `.insider` – Insider SDK which is the latest build for development
  - `.next` – vNext SDK (future)
- Plugin types
  - WMI Gateway or PowerShell Gateway
- HttpsPlugin interface (C#) – IPlugin deprecated
- Publish through NuGet (v2 API) feed
  - Microsoft Extension Gallery
  - <https://aka.ms/sme-extension-feed>

```
