Storage Developer (Virtual) Conference (SDC) EMEA 2022
June 14\(^{th}\) 2022
Call for Presentations
SNIA MISSION
The Storage Networking Industry Association (SNIA) is a global not-for-profit association advancing IT technologies, standards, and education programs for all IT professionals, enabling our members to develop robust solutions for storing and managing the massive volumes of information generated by today’s businesses.

INDUSTRY STANDARDS & EDUCATION
For more than 20 years we have worked to bring recognition of storage issues to the IT world, making storage less complicated for the end user. As a result, SNIA has adopted the role of industry catalyst for the development of storage solution specifications and technologies, global standards, and storage education.
FOCUS AREAS

TECHNICAL DEVELOPMENT

As a global non-profit organization, SNIA is dedicated to developing standards and education programs to advance storage and information technology. Our focus is concentrated in the primary storage technology development areas.
SDC EMEA 2021 METRICS

- **256** Delegates
- **36** Educational Sessions
- **75** Participating Companies
- **4.55/5** Delegate Event Rating
ABOUT SDC EMEA
The SNIA EMEA Storage Developer Conference (SDC) brings the storage developer community together to collaborate and network with peers through the sharing of ideas, industry developments and best practices. Usually held in Tel Aviv, SNIA is not able to hold a face-to-face event this year due to COVID-19 restrictions. However, it is important to continue the momentum that SDC brings to the storage development community in a virtual event. SDC will continue to present excellent and informative content, as well as provide many opportunities for networking.
THE CONFERENCE UNIQUELY DESIGNED BY STORAGE DEVELOPERS - FOR STORAGE DEVELOPERS

The Storage Networking Industry Association (SNIA) is a global not-for-profit association advancing IT technologies, standards, and education programs for all IT professionals, enabling our members to develop robust solutions for storing and managing the massive volumes of information generated by today’s businesses.

For more than two decades we have worked to bring recognition of storage issues to the IT world, making storage less complicated for the end user. As a result, the SNIA has adopted the role of industry catalyst for the development of storage solution specifications and technologies, global standards, and storage education.

The audience for this conference comprises of 200+ professionals from the IT storage development community — primarily storage software and hardware developers, storage product and solution architects, storage software engineers, product managers, storage product quality assurance engineers, product line CTOs, storage product customer support engineers, and in-house IT development staff.

A limited number of sponsors will have the opportunity to engage with this audience with product information and technology leadership as part of the conference agenda.

SNIA Storage Developer Conference (SDC) EMEA 2022

The SNIA Storage Developer Conference (SDC) is specifically aimed at storage technologists, architects, and developers who are tasked with making the critical storage design decisions to transform their information infrastructure. In attendance will be storage software and hardware developers, storage product and solution architects, storage software engineers, product managers, storage product quality assurance engineers, product line CTOs, storage product customer support engineers, and in–house IT development staff.

Speaker Information

SDC is now seeking the brightest minds in the industry: professional storage developers and researchers willing to share their knowledge and experience by submitting a presentation proposal for consideration at SDC. Speakers are requested to share their technical knowledge for the benefit of the audience and to avoid sales or marketing presentations. Presentations will be chosen based on their technical merit and interest to the SDC audience.

The standard session length are either 20 minutes or 40mins. Speakers will be given the option at the time of proposal submission. Online Q&A will take place during and after the recorded session playback and we request that speakers be available on the event platform at these times.

How to submit your presentation proposal

Submissions will only be accepted via the online form which can be found here:
https://www.snia.org/events/sdceMEA/cfp2022

Examples of previously presented SDC technical sessions can be found at:
https://www.snia.org/news-events/sdc-emea/archive

Important Dates/Deadlines

Deadline for submissions is March 25th 2022
Final notification of acceptance/non-acceptance of proposals: April 1st 2022
WHO WILL ATTEND

The audience for this conference comprises of 200+ professionals from the data storage development community — primarily storage software and hardware developers, storage product and solution architects, storage software engineers, product managers, storage product quality assurance engineers, product line CTOs, storage product customer support engineers, and in-house IT development staff.
Topics include (but are not limited to):

- Blockchain and Storage
- Cloud Storage
- Composable Infrastructure
- Computational Storage
- Container Storage
- Compute Express Link (CXL)
- Data Management
- Data Movement
- Data Placement
- Data Processing Units
- Data Protection and Data Security
- DNA Data Storage
- Emerging technologies
- File Systems
- Long term archival storage
- Machine Learning/Artificial Intelligence
- Memory Pooling
- NFS
- NVM Express
- Persistent Memory
- SMB
- Solid State Storage Solutions
- Storage Architecture
- Storage Fabrics Protocols
- Storage Networking
- Storage Performance / Workloads
- Storage Resource Management
The SDC EMEA agenda offers world-class technical education from leading subject matter experts.

The content will focus entirely on providing a platform for the brightest minds in the industry to share their expertise with storage developers and technicians.

All speakers are requested to share their technical knowledge for the benefit of the audience and to avoid sales or marketing presentations.

Agenda sessions are allocated in either 20min or 40min blocks, and selected speakers will be asked to ensure their recording is kept within that time.
THANK YOU
for your interest in SDC EMEA (Virtual)
