

SNIA® STORAGE SECURITY SUMMIT

Wednesday, May 11, 2022 • Virtual

About the Summit

Data storage security in 2022 will be transformed by a combination of new security technologies and principles, enforced by significant changes in some updated ISO standards that will evolve from guidance documents to compliance requirements.

SNIA is establishing this one-day virtual conference to bring together storage security professionals and subject matter experts across the storage and security industries for the purpose of awareness and education in the changes that will take place over the coming months.

Expected
Attendance

150

Hot Topics

- Emerging Storage Security Technologies
- Storage Security standards and specifications
- Cyber security and ransomware
- Data privacy
- Media Sanitization
- Zero Trust

Top 3 Reasons to Attend

- ✓ Learn about changes in Storage Security Standards
- ✓ Discover emerging storage security technology
- ✓ Network with other security professionals

Who Should Attend the Summit?

- End users
- Consumers/customers of storage technology
- Data center infrastructure managers
- Data protection officers
